### Green Cleaning Program Notification

Pursuant to Connecticut Public Act 09-81 and Board of Education Policy 1008, the South Windsor Board of Education has implemented a Green Cleaning Program in which the Board procures and properly uses environmentally preferable cleaning products in all of its school buildings and facilities. Our goal is to create an environmentally responsible cleaning program in our school system which embraces a healthy learning and work environment as well as a more sustainable environmental profile. Green cleaning procedures, processes, and communications play a key role in ensuring a healthier and safer working and learning environment for our students, staff and visitors.

The components of South Windsor's Green Cleaning Program include:

- The names and descriptions of environmentally preferable cleaning products being used in our schools
- The location and application of where cleaning products are used
- The schedule of frequency of when such cleaning products are applied
- Monitoring and enforcing the prohibition of cleaning products brought in from outside sources, as required by law.

**No parent, guardian, teacher or staff member may bring into the school facility any consumer product which is intended to clean, deodorize, sanitize or disinfect.**

South Windsor Public Schools utilizes a Chemical Management System for dispensing its cleaning chemicals. Each system is placed in a strategic and secure location at each school. The system is comprised of multiple dispensing options which allow flexibility and economy through accurate and consistent measurement of concentrated cleaners into RTU (Ready-to-Use) spray bottles, buckets and other cleaning equipment.

South Windsor Public Schools will continue to provide routine scheduled audits of cleaning products and cleaning equipment used in our schools as part of our Green Cleaning Program. We will also conduct scheduled training for our custodial staff to ensure they are trained properly and remain knowledgeable in the proper and safe use of the cleaning products and equipment used in our schools. We will strive to remain vigilant of ongoing changes in laws, cleaning techniques and cost effective products that may affect and improve our Green Cleaning Program.

A list of all cleaning products in use at our schools appears on the following page. This list is also available from each school as well as from our central Facility Operations office. Questions should be directed to the school principal or to the Director of Facility Operations ([greenclean@swindsor.k12.ct.us](mailto:greenclean@swindsor.k12.ct.us)).
